

Growee is revolutionizing the future of soilless agriculture by providing people with a smart solution that grows fresh, organic, locally grown plants all year long

Mission
Greening the world

Growee's mission is to color our concrete world in green once again. We aim to use our technology to bring nature into every corner of the city, from the office, to home to every free space indoor and outdoor.

We make fresh, organic food available all year round to people all around the world.

Sustainability
Growing more with less

Growee promotes soilless growing methods as a real solution for feeding the world's growing population while using minimal resources and no land.

Hydroponic solution uses 90% less water, 75% less fertilizers, no chemical pesticides, 90% less transport and 95% less space.

We are motivated to constantly increase yield quantities, improve plant nutrition value and provide organic crops for more people.

Research
The secret to the green thumb

Growee is developing a unique growing protocol for each plant. We are driven to discover the true potential hidden in plants in order to bring the world the highest quality crops.

We do that by working together with leading researchers and agronomists, collaborating with top research facilities worldwide, and promoting unique and new research.

Education
The future looks greener than ever

The new generation of growers, kids across the world, are changing the future of agriculture by mastering soilless methods at school.

Combining education about traditional agriculture with Growee's app and smart technology encourages student engagement in class and cultivates interest in STEM.
